MANUFACTURING SKILL

STANDARDS COUNCIL

The Manufacturing Skill Standards Council (MSSC) is an industry-led training, assessment and certification system focused on the core foundational skills and knowledge needed by the nation's production workers. The nationwide MSSC System, based upon federally endorsed national standards, offers both entry-level and incumbent workers the opportunity to demonstrate that they have mastered the skills increasingly needed in the high-growth, technology-intensive jobs of the 21st century.

“I believe that without the MSSC Production Technician Certification my employer, Honda, would never have given me a chance for this job.”

Derrick Robinson
West Harrison, IN

MSSC SYSTEM AWARDS

CERTIFICATES

The MSSC System awards “Certified Production Technician (CPT)” certificates to individuals who pass skills tests on all four production modules:

- Safety
- Quality Practices & Measurement
- Manufacturing Processes & Production
- Maintenance Awareness
